Best Quality - Best Price

MICROS Microtome Blades

The basis of every good microscope analysis is the perfect cut. **MICROS Austria** offers perfectly adapted blades for every tissue and enables precise cuts and the best results in your laboratory.

MS 200 the All-Rounder

All-rounder with unique hardened blade cutting edge, excellent durability. Especially suitable for ribbon sectioning, excellent sharpness, even with very thin cuts.

MS 300 the Bone-Hard

A very sharp blade, especially recommended for cutting bone tissue. Also perfect for all other tissue types as well as for ribbon sectioning.

MS 24 the Ice-Queen

Robust blade, Suitable for hard tissues but also for soft tissues and bone biopsies. Very good results also with animal preparations and for cryostat.

MS 33 the Sensitiv-One

Blade for applications where extremely thin, high-quality sections are required. Suitable also for skin biopsy. Short trimming time and increased durability.

HP Big-Player

High profile blade with high cutting quality at a constant load.

Trimming Knife Avant-Gardist

Trimming knives are special blades for cutting tissue samples without causing deformations of hard tissues with fibers, soft or semi-fixed organs.
